“Token Storm World ICO Showcase comes to Mumbai 16 January with one of the most awaited tokens of 2018 - Capital Coin”

Mumbai, Maharashtra: Arifa Khan, a former investment banker with Credit Suisse and UBS has announced that she will be leading Token Storm – a Global ICO showcase, featuring leading Blockchain startups and experts, in a roadshow across China, Japan, India the UK and Switzerland.

Token Storm, part of Zero Field Labs - a Blockchain eco-system play - aims to create the foundations of a new token economy ecosystem which will bring together the world's leading Blockchain startups along with key players in the crypto landscape spanning investors, developers, Government and crypto enthusiasts.

This will be the first time that Global ICOs, leaders of digital currency space and experts in the crypto market are coming together in a global roadshow to create opportunities for education and collaboration in the Blockchain ecosystem.

Token Storm – The Foundation of a Global Ecosystem of Crypto Pioneers

“Given the unprecedented growth of the Blockchain industry, we believe that Token Storm provides a real platform for anyone to learn about and participate in future of Blockchain, something that makes the crypto industry unique. We invite partners from across the globe to join us in making Token Storm the event of choice for anyone in the crypto world that wants to join the Blockchain revolution” said Arifa Khan, Founder of Token Storm.

Previous ICO showcases have attracted thousands of participants and have featured the world's most passionate crypto enthusiasts and prominent experts, and covered more than 10 countries in megapolis such as Singapore, Hong Kong, Seoul, Shanghai, London, Dubai, Istanbul, Kiev, Paris, Chennai. Token Storm aims to expand its presence to provide coverage to crypto communities around the globe.

ICO Showcase in Mumbai

The tour kicks off with Shenzhen on 9th January 2018 followed by Shanghai – 10th January, Tokyo – 12th January, Mumbai – 16th January, Davos - 22nd January, right before the commencement of the World Economic Forum and finally ends with London – 31st January. In each city, Token Storm will host ICOs, the Bitcoin, Blockchain and crypto community, potential investors, and market participants.

"We are delighted to participate in events by Token Storm. With their global reach and network, Blockchain expertise and track record, Token Storm is the ideal venue for global disruptive ICOs to connect with investors and the public alike, to showcase their venture across the world, and to build a user community. Arifa Khan has been a pioneering eco system builder since blockchain's early days. Her network and access in the crypto economy is phenomenal and one can only aspire to experience the richness of insights

and the connections she has with the crypto innovators across the globe” **says Mario Pazos, Blockchain Angel Investor and an early backer of Capital Coin ICO.**

The Blockchain industry is growing tremendously and India especially Mumbai is starting to emerge as a blockchain and cryptocurrency hub. After recently hosting it's first blockchain hackathon the city is experiencing a boom in blockchain innovations. Naturally, Token Storm shall be a part of this burgeoning conversation in Mumbai, to showcase Blockchain and its disruptive role in adaptation of digital technology. The Token Storm meet up and showcase in Mumbai represents a unique opportunity for tech enthusiasts, investors, developers and the local community to participate in Blockchain projects and witness first-hand the paradigm shift coming to disrupt various age-old industries.

Capital Coin – One of the most promising ICOs of 2018

"As if online book building/ trading was not enough, the Crypto Economy, with a much more vast array of possibilities is likely to overhaul the way in which primary and secondary capital markets operate. To pick just a couple of aspects that are 'ripe targets' - the current, less than optimum allocation and settlement protocols are suddenly looking archaic, highly inefficient and often bordering on being unfair." **Said Maneesh Malhotra, Senior Debt Capital Market Specialist, Capital Coin ICO Adviser.**

Capital Coin is one of the most promising and groundbreaking ICO of 2018 and is a venture that shall take on the investment banking industry through Blockchain and Fintech innovation. At present, companies and start ups trying to raise funds must go through investment banks. Investment banks then advise and help procure financing by matching issuers of capital with investors in an opaque system whilst also charging fees of close of 7-10% from both parties. Capital Coin plans to enter this market and change the landscape of fundraising by connecting issuers of capitals directly to investors and making transactions public and transparent.

Capital Coin shall achieve this by building a Decentralised Global Capital Markets Platform (DGCAMP) built on blockchain technology. This has huge potential impact on not just in the fund raising context but on the financial industry too as Capital Coin's blockchain driven platform shall eliminate the need for intermediaries and ensure transparent, frictionless transactions between parties. Not only would the cumbersome fees associated with IPO's and other fund raising methods of investment banks be abolished but generating and transferring capital shall become much simpler and quicker.

About Arifa Khan, Chief Architect - Token Storm

Arifa Khan is a Blockchain technology evangelist, founder of Capital Coin ICO - a decentralized stock exchange platform and Token Storm – a leading crypto roundtable.
